- Reducing fertilization costs by 30, Saving time, effort and money.

Our Products

Irrigation machine

Smart Solar Powered Portable Irrigation Machine.

Control unit

For optimizing farms and management all farming processes.

Our Services

Maintenance and follow-up services

Vision & Mission

- Our mission is to create more sustainable user-friendly, and economically friendly methods for irrigation and agricultural land management to reduce water wastage rates, increase productivity rates, create new job opportunities, and avoid any environmentally polluting carbon emissions.
- AgriEagle envisions a sustainable future for Egypt's agriculture by 2030, targeting reduced carbon emissions by 12% and saving 8 billion cubic meters of water waste. By 2033, the company aims to empower 15,000 small farmers, capture 25% of the market, and achieve a 2% economic growth in the sector.
